This hard work is dedicated to my mother, Fatimah binti Asmuni and my father, Abdul Rahman bin Johari who love me and support me during my whole journey of education.

ACKNOWLEDGEMENTS

Alhamdulillah, a very thankful to Allah S.W.T with His help, I have been able to complete this final year project. Many of my colleagues in my university and my lecturers have made constructive criticisms that have helped in the development of this final year project. I would like to hereby acknowledge all of their valuable suggestion and comments.

I personally would like to thank my supervisor, Dr. Nur Farhayu binti Ariffin for her guides and advices during my final year project development. I really appreciate the efforts and time she had spent which eventually enable me to complete my thesis.

My outmost gratitude to Universiti Malaysia Pahang, UMP for giving me such a precious experience and knowledge that I believe it will be beneficial for my future. No words can describe how grateful I am for having people that have great concern and taken care of me ever since my first step in UMP.

Finally, I would like to acknowledge the help I received from my parents and family, who has always been very supportive and helpful in my life. Last but not least, to all the parties involved not only in my project but also giving the best memories throughout these four years in UMP.
